

API-VIT MULTI-PLANT EXTRACT SYRUP

Ingredients: beet sugar inverted syrup 75%, purified water, vegetal extracts (wormwood, yarrow, sea-buckthorn), citric acid, vitamin B1, vitamin B2, vitamin B6, vitamin B12, vitamin H (biotin), vitamin C, vitamin PP, calcium pantothenate, anhydrous glucose, sodium chloride, cobalt chloride, disodium phosphate.

Presentation: Packed in plastic bucket fitted with lid and handle, weighing 20 kg or 5 kg. The combination of the plants along with the sugar biostimulator have a nutritious effect and also stops the effects of nosema disease (nosema apis) in bees.

Use: Recommended for nutrition and stimulation (increases the spawn rate of the queen bee) at temperatures above 10°C.

Does not crystallize, does not ferment.

Does not require adding water or other ingredients. API-VIT SIROP MULTI PLANT EXTRACT is a complete product used against nosema.

API-VIT SIROP MULTI PLANT EXTRACT contains plant extracts, biostimulators and vitamins, therefore we recommend MIXING THE PRODUCT BEFORE USE!

Used in any type of feeder, depending on the necessities of the beehive.

Validity: 12 months from the manufacturing date.

API-VIT NOSEM

Indications and action: API-VIT NOSEM is indicated when the natural harvest is diminished or absent. For the bees families' development, as adjuvant in infectious and parasitic diseases, especially in nosemosis.

API-VIT NOSEM has a beneficial action upon the bee's digestive tract, favoring the absorption and the nutrients' usage from the artificial food. **API-VIT NOSEM** diminishes the intestinal pH, preventing the development and the proliferation of the pathological germs and thus favoring the multiplication of the useful lactic acid bacteria.

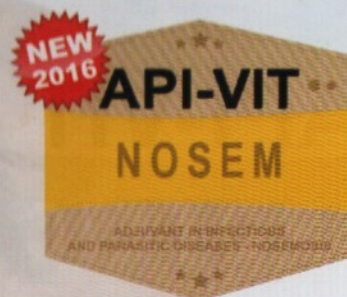

Composition : medicinal plants (thyme, basil, mint, chicory) 20 g. / 100 ml. product, alimentary acetic acid 10 ml./100 ml. product, pharmaceutical ethyl alcohols 5 ml. / 100 ml. product, purified water up to 100 ml. product.

Administration method: 20 ml. / liter of liquid food; 40 ml. / kg. of solid food;

Presentation: Plastic bottle provided with cork and seal with a weight of 300 ml. / 600 ml.

Validity: 24 months from the date of manufacture.

Storage: in cool place, max. 25°C

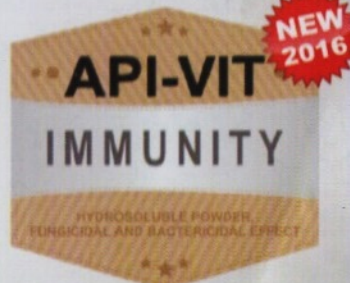

API-VIT IMMUNITY

API-VIT IMMUNITY - hydro soluble powder is a product especially conceived for the immunity of the bees' families' strengthening, for the increment of the apiculture products' quality. The concentration and the profile of the minerals that are present in the **API-VIT IMMUNITY** product correspond to a good running of the physiological process specific to the bees' families and at the same time, they have a strong fungicidal and bactericidal effect, having a prophylactic action for nosema and loca.

Presentation: biostimulator of apiculture usage, the **API-VIT IMMUNITY**, presents itself in a form of grey-ash colored powder, packed in aluminum foil in an amount of 25 gr./sachet. The cardboard box contains 4 sachets of **API-VIT IMMUNITY** (25 gr. powder x 4 sachets).

Validity: 12 months from the date of manufacture

API-VIT SUPPLEMENT

API-VIT SUPPLEMENT from inverted sugar is obtained with the latest European technology in the domain using only stainless steel equipments. All ingredients are processed at low temperatures in order to preserve in its composition all vitamins and minerals necessary for the development of the bee families.

Ingredients: beetroot sugar, choline (biotin), niacin thiamine, riboflavin, pyridoxine, nicotinamide, cobalamin, calcium pantothenate, sodium chloride, cobalt chloride, disodium hydrogen phosphate, citric acid, ascorbic acid, folic acid, vegetal extracts, purified water.

Use: Cut a triangular hole with a side of approximately 10 cm. into the package and place it with the cutout side onto the frames, above the beehive.

Storage: Keep in cool place, max 25°C.

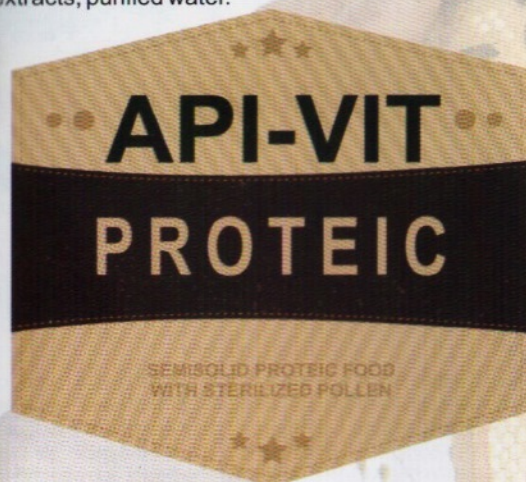

Presentation: Professional bee feed, packed in 1 kg labelled plastic bag.

Validity: 12 months from the manufacturing date.

API-VIT PROTEIC

The vitamins, minerals, the vegetal extracts and the complete profile of the present amino-acids are presenting the product **API-VIT PROTEIC** from inverted sugar as the perfect and complete food for the nutritional needs of the bee's families during the critical periods of their development.

Ingredients: beetroot sugar, electro-magnetic sterilized pollen, methionine, lysine, cysteine, threonine, tryptophan, calcium, magnesium, sodium, phosphorus, selenium, copper, iron, zinc, manganese, choline (biotin), niacin thiamine, riboflavin, pyridoxine, nicotinamide, cobalamin, calcium pantothenate, sodium chloride, cobalt chloride, disodium hydrogen phosphate, citric acid, ascorbic acid, folic acid, vegetal extracts, purified water.

Use: Cut a triangular hole with a side of approximately 10 cm. into the package and place it with the cutout side onto the frames, above the beehive.

Storage: Keep in cool place, max 25°C.

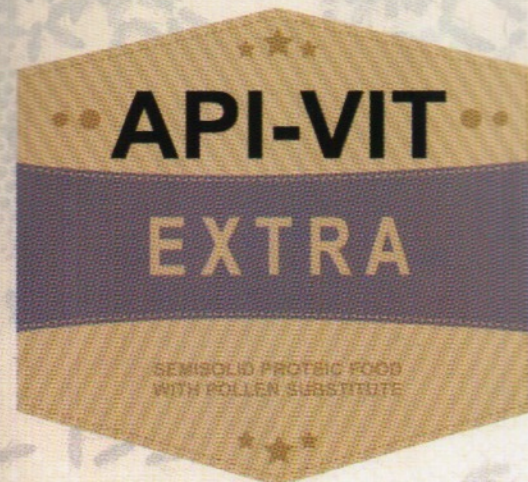

Presentation: Professional bee feed, packed in 1 kg labelled plastic bag.

Validity: 6 months from the manufacturing date.

API-VIT EXTRA

API-VIT EXTRA with pollen substitute from inverted sugar seeks to provide a high quality product that combines the ancient tradition of Roman beekeepers with its use as a source of protein that substitutes pollen. **API-VIT EXTRA** can be used by all beekeepers that are reluctant regarding pollen containing bee feed.

Ingredients: beet sugar, pollen substitute, vitamins (choline, biotin, niacin and thiamine, riboflavin, pyridoxine, nicotinamide, cobalamin, calcium pantothenate), acids (citric acid, ascorbic acid, folic acid), biostimulators (sodium chloride, cobalt chloride, disodium phosphate-disodium hydrogen phosphate), vegetal extracts (sea buckthorn, woodworm, yarrow), purified water.

Due to its composition and packaging, **API-VIT EXTRA** with pollen substitute from inverted sugar maintains its fine, semisolid paste consistency for a long period of time, even after removing the package. The vegetal extracts it uses are focused on stopping and minimizing the destructive effects of nosema on the bee families, making **API-VIT EXTRA** with pollen substitute from inverted sugar an excellent ally in the fight against this parasite.

Use: Cut a triangular hole with a side of approximately 10 cm. into the package and place it with the cutout side onto the frames, above the beehive.

Storage: Keep in cool place, max 25°C.

Presentation: Professional bee feed, packed in 1 kg labelled plastic bag.

Validity: 8 months from the manufacturing date.

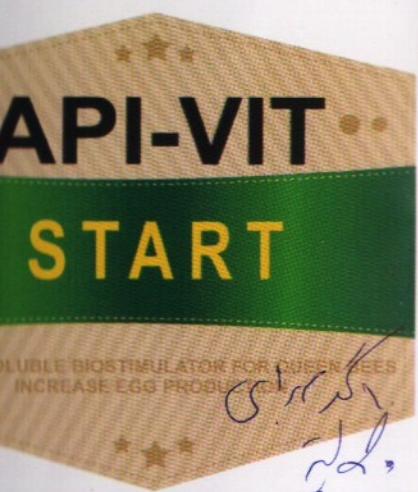

API-VIT START

API-VIT START hydrosoluble biostimulator contains the most important elements that lead to the improvement of the health and productivity of bees.

It can be used without any concern throughout the entire rearing season, whenever we want a development of the bee families.

It can be used for creating new biological units of the bee families that benefited from the effects of the **API-VIT START** biostimulator;

the **API-VIT START** biostimulator proves its effectiveness once again by means of an impressive young, healthy bees, that are fully prepared to survive the winter;

Composition: anhydrous glucose, sodium chloride, disodium phosphate.

Use: The **API-VIT START** apicultural product is in the form of white powder, packed in sachets of 10 grams each. The box contains 4 sachets (10 grams of powder per sachet).

Preparation: The powder in one **API-VIT START** sachet is mixed with 1 liter of water, 1 kg sugar at room temperature and the entire resulting quantity of syrup is administered to approximately 20-30 bee families.

Indications and action: For forming new biological units by accelerating the development of bee families, the active substances stimulate the development and spawning by the queen bee, while contributing to the metabolism of amino acids, carbohydrates.

Store in cool, dry place, at temperatures below 25°C.

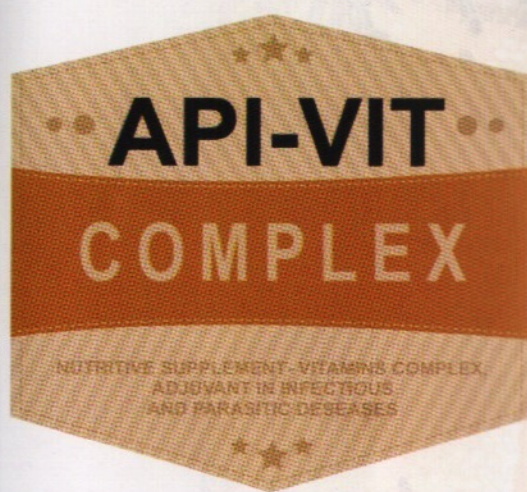

Validity: 12 months from the manufacturing date.

API-VIT COMPLEX

Indications and action: The product **API-VIT COMPLEX** is indicated in case of low natural vitamin intake, intoxications and digestive disorders, as well as an adjuvant in infectious and parasitic diseases. It is also indicated in the periods of the season without natural harvesting.

Use: To be used in the liquid feed (syrup) 1 gram/1 liter and in the solid feed (paste) 2 grams/kg.

Composition: vitamin B1, vitamin B2, vitamin B6, vitamin B12, vitamin H (biotin), vitamin C, VITAMINA PP, calcium pantothenate.

The vitamins in the composition participate directly in the metabolism of carbohydrates, fats and proteins and are important in the hemolymph synthesis, the nutrition of the nervous system, in oogenesis and in the formation of fat bodies in winter bees.

Presentation: 200 grams plastic container with hydrosoluble vitamin powder and plastic dosage spoon (4 grams dosage spoon).

Validity: 1 year from the manufacturing date.

Storage: Keep in the original container, away from humidity and at temperatures below 25°C.

API-VIT NOSEM

Indications and action: **API-VIT NOSEM** is indicated when the natural harvest is diminished or absent. For the bees' families' development, as adjuvant in infectious and parasitic diseases, especially in nosemosis.

API-VIT NOSEM has a beneficial action upon the bee's digestive tract, favoring the absorption and the nutrients' usage from the artificial food. **API-VIT NOSEM** diminishes the intestinal pH, preventing the development and the proliferation of the pathological germs and thus favoring the multiplication of the useful lactic acid bacteria.
