

# Filling and honey processing

swienty

## Swienty - made in Denmark

Swienty A/S manufactures advanced, user friendly, operator safe honey processing systems that are able to meet the demands of both small and medium to large honey processors.

### Award Winning Filling Machines:

Already at Apimondia 1987 in Warsaw our highly successful DANA api MATIC was honored with the gold medal for technical innovation. Since then our DANA api MATIC filling machine program has been appreciated for its ease of programmability, cleaning, efficient pump and precise metering.

### Mix'n Match Modular System:

Swienty's filling system is based on a modular principle, which means you can mix'n match our products and customize your own filling unit to meet your specific needs. The modular principle also ensures flexibility for your future expansions. Our machines grow with your operation and not vice versa.

Reliability, ease of use and superior craftsmanship are Swienty's key concepts to growth. Today Swienty products are sold in more than 60 countries.
